

The medieval garden at the château du Haut-Koenigsbourg

The medieval garden at the château du Haut-Koenigsbourg includes vegetables, medicinal plants, plants used in the dyeing of textiles, flowers and sweet-smelling herbs. It offers a glimpse of just how diverse 15th century gardens were.

The château's garden is one of 11 medieval-style gardens to be found in the villages of the neighbouring area, which have much to offer tourists, including this gardens tour. Explore the garden as part of a tour of the château.
